KITCHEN DESIGN!**

**WINNER**

# NO EXTERNAL VENTILATION REQUIRED

Designed for front-of-house cooking for restaurants, sports arenas, cafeterias, convention centers, resorts, grocery stores and foodservice operators without an overhead vent hood.

The Evo EVent® 48E includes a high-efficiency electric griddle integrated with a ventilation system that pulls air across the griddle surface through a series of filters including an electrostatic precipitator that removes smoke and grease particulates before exhausting clean air. Additionally, The EVent is equipped with the latest in technology and safety and includes a Buckeye Model BFR-5, Kitchen Mister Automatic Fire Suppression System for commercial cooking applications.

Model# 10-0148-EVT  
**INDOOR**  
 ELECTRIC 40AMP  
 24" x 48" Griddle

Shown Customized with  
 10-0150-EVT-FMS

- Rectangular steel griddle surrounded with black granite counter top
- Resistive touch screen display controls cook temperature presets and filter condition monitoring
- Low noise, high efficiency CFM downdraft ventilation system with chef-side intake aperture and discharge duct
- Self-contained fire suppression system with nozzles in cross-pattern arrangement provide a continuous zone of protection

The Evo EVent® has a four-stage filtration system:

- Stage 1 - An internal stainless steel grease filter captures airborne grease. This metal filter is washable.
- Stage 2 - An aluminum mesh filter captures airborne food particles. This metal filter is washable.
- Stage 3 - An electrostatic precipitator filter further extracts airborne grease, and smoke particles. This metal filter is washable.
- Stage 4 - The last filter is a disposable activated charcoal post-filter.
