Hand Wash Sanitisation Stations

'Making Cleanliness Easier'

BASIC HAND WASH SANITISATION STATION

Improve hygiene standards with Target's free-standing stainless steel hand wash sanitisation stations. Quick and easy installation - Sink units are of robust construction and suit a range of taps and offer various hygiene options, suitable for use in catering, medical, care, marine and production applications. Target's hand wash sanitisation stations can also be used when only a cold water feed is available when the inline instantaneous water heater add-on is specified.

Target's basic commercial stainless steel hand wash sanitisation stations provide a cost effective hand washing station solution that can be customised through various hygienic add-on options making them suitable for use in many applications. Designed to fit up against a wall, with rear legs inset 100mm allowing clearance for surface mounted plumbing and electrical services to run behind. The basic station is manufactured with a fully welded open framework base, complete with fixed base shelf with anti-drop edge and height adjustable metal flanged feet as standard.

| Dimensions | Width (mm) | Depth (mm) | Height (mm) |
|------------|------------|------------|-------------|
| BASIC-HWSS | 600 | 650 | 900 |

FEATURES INCLUDE:

- Material: 304 grade stainless steel - Worktop, framework & undershelf
- Finish: dull polish satin
- 60 x 30mm upstand to rear
- Sink Bowl Dimensions: 380mm diameter x 150mm deep
- Pre-drilled tap holes (taps available separately)
- Anti-drip creamer edge profile to front and sides of worktop
- Fixed base shelf with anti-drop edges
- Height adjustable metal flanged feet
- Fully welded construction
- 100mm service void to rear
- Delivered fully assembled

ADDITIONAL OPTIONS:

- 60 x 30mm upstands to sides
- Rear backsplash panel
- Sanitiser, soap and paper towel dispensers
- Side shelf attachment
- WRAS approved Zip ES3 inline instantaneous water heater

At Target Catering Equipment, we take care of our environment. Therefore, this flyer is printed on 100% recycled paper and is printed using 100% electricity from renewables. Recycled paper requires much less water and a considerable reduction in energy consumption compared to regular paper. Since our environment is key to us we are committed to keeping our carbon footprint at a minimum, being as sustainable as we possibly can.
